

REMARKS

Applicants have substituted into the present specification substitute pages 45-48 of the paper copy Sequence Listing section according to 37 C.F.R. §1.821(c). Furthermore, attached hereto is a 3 1/2" disk containing the "Sequence Listing" in computer readable form in accordance with 37 C.F.R. §1.821(e).

Applicants noticed that previous SEQ ID NO:19, i.e., the nucleotide sequence of 29F3, was missing the last line, i.e., nucleotides 961-985. The addition of nucleotides 961-985 in SEQ ID NO:19 does not represent new matter as SEQ ID NO:19 is identical to Figure 9 (showing the sequence of 29F3) of parent application no. 09/384,096, the entire contents of which was incorporated by reference in the present application. The omission of nucleotides 961-985 from SEQ ID NO:19 was merely a typographical/clerical error and entry of the attached revision of SEQ ID NO:19 in substitute sequence listing pages 45-48, so that the sequence for 29F3 will be the same as disclosed for 29F3 in the parent, is respectfully requested.

The following statement is provided to meet the requirements of 37 C.F.R. §1.825(a) and 1.825(b).

I hereby state, in accordance with 37 C.F.R. §1.825(a), that the amendments included in the substitute sheets of the sequence listing are believed to be supported in the application as filed and that the substitute sheets of the sequence listing are not believed to include new matter.

I hereby further state, in accordance with 37 C.F.R. §1.825(b), that the attached copy of the computer readable form is the same as the attached substitute paper copy of the sequence listing.

Applicants submit that the present application contains patentable subject matter and therefore urge the examiner to pass the case to issuance.

If the examiner has any questions or comments concerning the above described application, the examiner is urged to contact the undersigned at the phone number below.

Respectfully submitted,

BROWDY AND NEIMARK, P.L.L.C.
